PROFESSIONAL SUMMARY

UX/UI Designer and Mid-level Full Stack Developer, working on real-world projects since 2025. I work with end-to-end technical autonomy: from research and design in Figma to implementation, deployment and production maintenance. At TecSinapse, I am responsible for the design and development of client websites and internal products.

My strengths are production debugging with root cause analysis, WordPress performance and security, form validation without external libraries, design systems with design tokens, and WCAG accessibility. Pursuing a double degree in Systems Analysis and Development and Graphic Design. Open to remote mid-level opportunities.

TECHNICAL SKILLS

Front-end: Semantic HTML5, CSS3 (native variables, animations), JavaScript ES6+, TypeScript, React, Next.js, React Router, Tailwind CSS, jQuery, Bootstrap 5, responsive design.

Back-end and CMS: PHP (modular architecture, input sanitization, nonce), WordPress with custom themes, page caching, PHPMailer, Amazon SES.

Integration and APIs: REST APIs, Fetch, Axios, React Hook Form, webhooks with n8n, cURL, lead integration with CRM.

UX/UI and design: Figma, design systems, design tokens, interactive prototyping, user research, usability testing, Nielsen's heuristics, WCAG accessibility, information architecture.

DevOps and quality: Git, GitHub, GitHub Actions (CI/CD), automated deployment, Vercel, ESLint, Prettier, Node and NPM, SSL and DNS, Lighthouse, security headers, DevSecOps, Chrome DevTools.

Data and AI: Python, pandas, SQL, Power Query (ETL), anomaly detection, prompt engineering, Claude, Claude Code, ChatGPT, Gemini.

SEO: Technical SEO, Open Graph, JSON-LD Schema, sitemap, Google Search Console.

Process: Scrum, Kanban, code review, technical documentation, design-to-development handoff.

PROFESSIONAL EXPERIENCE

Multimedia Design Intern | TecSinapse

02/2026 - Present | Remote

Responsible for the design and development of client websites and internal products, from interface to deployment.

- **Bajaj Brasil:** diagnosed why leads were reaching the CRM without a valid Brazilian taxpayer ID and built a central PHP validation module, with an anti-bot honeypot, applied to 106 forms and 77 dealership pages in a single deployment.
- **Bajaj Brasil:** cut homepage response time by 99.7%, from 329 ms to 1 ms, by finding page caching disabled by a PHP session present in about 150 templates. Extended caching to campaign traffic and reduced active plugins from 38 to 17.
- **Bajaj Brasil:** centralized credentials exposed in 113 files, introduced version control with automated deployment, and built an accessible FAQ component, reusable across multiple pages and editable by the client.
- **VOGE Brasil:** co-developed the form system with taxpayer ID, phone and email validation without libraries, dependent selects covering over 5,570 municipalities, and lead integration with the CRM via REST API, with an email fallback.
- **Internal products:** created design systems and screens in Figma, with documented states and developer handoff, including the redesign of a permissions management screen now implemented in the product.

Founder, UX/UI Designer and Web Developer | BORDA Design

01/2025 - Present | Self-employed, remote (freelance since 01/2025, studio formalized in 10/2025)

- Lead end-to-end UX/UI and web development projects, from strategic research to delivery, managing client relationships and multiple simultaneous projects.
- Built the studio's website with a modular PHP architecture, design tokens in CSS Variables, light and dark themes, Portuguese and English without page reload, and automated deployment via GitHub Actions.

Community Administrator (volunteer) | Tech Girls

05/2026 - Present | Remote

- Administer the community for women in tech and the publishing of job openings and announcements for members.
- Develop the community's Discord bot: serverless on Cloudflare Workers, vanilla JavaScript with zero runtime dependencies, Ed25519 signature verification with native Web Crypto, and 121 automated tests.

FEATURED PROJECTS

Personal portfolio (portfoliosamara.com.br). Designed in Figma and built with Next.js, React, TypeScript and Tailwind, with design tokens in CSS Variables, MDX content, AA contrast measured in both themes, full keyboard navigation and continuous deployment on Vercel.

Apoia.se SouJunior landing page. Hackathon with a team of 9. Responsible for UX/UI and the design system: three-layer tokens, contrast for every color pair calculated before layout, and the HTML and CSS skeleton that let three developers build in parallel. Live at soujunior-apoiase-landingpage.vercel.app.

EDUCATION

Technology Degree in Systems Analysis and Development

Universidade Positivo, Distance Learning | 08/2025 - 08/2027

Technology Degree in Graphic Design

Uninter, Distance Learning | 11/2025 - 11/2027

CERTIFICATIONS

Development: React Developer Program (DIO, 34h, 2026), WordPress: Building Sites with Elementor and Figma (Alura, 10h, 2026), Software Engineering (Universidade Cruzeiro do Sul, 20h, 2025), Git and GitHub (Alura, 8h, 2025), Programming Logic with JavaScript (Alura, 6h, 2025), Front-End with JavaScript and HTML (Ada, 9h, 2025).

UX and design: UX Design Career Path, 3 levels (Alura, 198h, 2025), UX Career Development Program (Alura, 46h, 2025), UX Design Program (Alura, 42h, 2025), Figma Program (Alura, 41h, 2025), UX Research Program (Alura, 32h, 2025), Accessibility in UX Program (Alura, 31h, 2025).

Data, AI and security: Bradesco Bootcamp: GenAI, Data and Cyber (DIO, 52h, 2026), Cyber Threat Management (Cisco Networking Academy, 2025), Claude Code in Action, Claude 101 and AI Fluency: Framework and Foundations (Anthropic, 2026).

LANGUAGES AND SOFT SKILLS

Languages: Portuguese (native), English (intermediate), Spanish (basic).

Soft skills: autonomy, analytical thinking, clear communication, multidisciplinary teamwork and continuous learning.
